

## **Their Mentor**

At the start you plant a seed  
from there you have to prepare  
Give them food and water  
along with a lot of care

As they grow and except who they are  
you must show that you can be fare  
As you know how far to set the bar  
you must flow to find their gear

Give praise for doing well  
for those in the groove  
Give advice when things don't jell  
because your there to help them soothe

Be meaningful for them to excel  
because they do want to improve  
Encourage them to ring their own bell  
and be helpful for those on the move

For the commitment to manage  
you have to believe in their deed  
and give them the wright language  
so they feel someone of need
